

Transportation Reference Data

This manual is both a planning guide for staff and unit officers and a digest of operational data for reference by operators and users of transportation. It gives characteristics of typical transportation equipment and facilities and methods for estimating capabilities and requirements for transportation equipment, facilities, and troop units. It provides personnel and equipment data for the modes of transportation and for transportation terminals; and data for computing requirements for staff, supervisor, and control activities. It also addresses administrative support requirements.

Cuando éstos pertenecían a la nobleza, era aún mayor el empeño por conservar esa condición de nobles hidalgos, y acreditarla debidamente mediante documentos, que la justificaran, para así transmitirlo a sus descendientes.
